

$$A = \begin{pmatrix} 0 & 6 & 1 \\ 1 & 7 & 5 \end{pmatrix}$$

→ $\begin{pmatrix} 1 & 7 & 5 \end{pmatrix}$

$$B = \begin{pmatrix} 0 & 3 & 1 \\ 1 & 0 & 1 \end{pmatrix}$$

→ $\begin{pmatrix} 1 & 0 & 1 \end{pmatrix}$

$$r_1, c_2$$

Row player:

$$\begin{aligned} (\emptyset, \emptyset) &\rightarrow r_1 \\ (r_1, c_1) &\rightarrow r_2 \\ (r_1, c_2) &\rightarrow r_2 \\ (r_1, c_3) &\rightarrow r_2 \end{aligned}$$

Col player:

$$\begin{aligned} (\emptyset, \emptyset) &\rightarrow c_2 \\ (r_1, c_2) &\rightarrow c_3 \\ (c_2, c_2) &\rightarrow c_1 \end{aligned}$$

$$\begin{pmatrix} r_2 & c_1 \\ r_2 & c_2 \\ r_2 & c_3 \end{pmatrix}$$

NE?

$$(6, 3) + (5, 1) = (11, 4)$$

- row player: if deviate in first round gain 1 but lose 4.
- col player: no reason to deviate
